1. In the middle of March 1953, CKD (Ceskomoravska-Kolben-Danek) Ceska Lipa, National Enterprise, in Ceska Lipa /5041N-1433E/, which produced electric dynamos and other heavy electric equipment, stopped production because of lack of small drill chucks in sizes 6 mm. and below. (Fnu) KLIMA, production inspector of the Main Administration of Electrical Engineering of the Ministry of Heavy Engineering, telephoned the presidium of the Council of Ministers at that time and asked them to procure this material, stating that without these drill chucks the plant's production plan for March 1953 would be fulfilled to only 17%. The CKD Ceska Lipa plant needed about 2,000 drill chucks.
2. The factory in Czechoslovakia which had produced these drill chucks switched to some other production, and the production of drill chucks was transferred to another factory which was scheduled to begin production of drill chucks in the second half of 1953. [REDACTED]
